RUBBER BLANKET CLAMP PIN OPERATION AND SAFETY GUIDE

SLINGCO PART NOS. ZPE10962 & ZPE12136

⚠ ATTENTION

READ and **UNDERSTAND** all of the instructions and safety information in this manual before operating or servicing this tool.

Failure to read and understand these warnings and safe handling instructions could result in severe personal injury or death.

KEEP THIS MANUAL WITH TOOL.

DESCRIPTION

- The Slingco Blanket Clamp Pin is constructed of ultraviolet stabilized fiberglass-reinforced polymer.
- Blanket Clamp Pins are used to hold insulating blankets and other types of rubber cover-ups in place. The extra holes in the center of the body are used to grip conductors and prevent linehose from sliding.
- The handles of the pin are shaped to engage into the end ferrule of a clampstick (shotgun stick).
- Holes have been placed in the handles to enable attachment of warnings, tags, and/or flags.
- Inspect Blanket Clamp Pins before and after each use. If there is any damage discard the product immediately.
- Temporary items are intended to be inspected frequently. Follow your company's standard work practices or inspect routinely.
