POWER(FUL) INNOVATION.™

New Klondike Clamp®

New Features, Same Function... Same Part Number, Same Price!

The KLONDIKE CLAMP® has a new look with all of the same great features you've come to expect from Utility Solutions, and a few new ones as well!

This updated design offers improved ergonomics and an innovative lineman-friendly grip, providing better control when you're working with gloves. The extended handles means the clamp is easier to use, and the springs mean you still get the same strong clamping force. The flared opening makes push-on installation easy and fast. It's perfect for one-handed operation!

The KLONDIKE CLAMP® makes it easier for crews to secure their rubber blankets and other coverups because they don't have to stop working to tie them down with rope or tape. This helps minimize downtime on a job site and reduces the likelihood of damage to your blankets.

The new KLONDIKE CLAMP® is made from high-strength, ribbed polymer and features molded eyelets for extra security or tagging. Made in the USA.
